

Impact of 50% Reduction and SB287 Cap on Purchasing Capability of Professional Development Funding

This graph depicts what has been occurring with the state's professional development funding since 2005. Under SB 380 1% local and 1% state funding was provided to support a low cost, accessible and equitable system of professional development services. As you can see under the green line is declining in such a manner that the state low cost services are declining rapidly.

While the Governor's budget hasn't been fully approved by legislatures, its impact is illustrated in the chart provided.
